BOLA ISHAK NAGUIB

Senior Full-Stack & DevOps Engineer | Laravel · Vue.js · AWS

Shubra masr, Cairo | +201555622169 | bola.ishak41@gmail.com | LinkedIn | GitHub

Nationality: Egyptian | Seeking Full-Time Roles, Open to B2B Contracts

PROFESSIONAL SUMMARY

Senior Full-Stack & DevOps Engineer with 5+ years of professional experience building and scaling SaaS, fintech, ERP, IoT and on-demand delivery platforms with Laravel, Vue.js, AWS and Docker. Owned backend architecture and production deployments for a platform serving 10,000+ active users and 1,000+ daily orders, and delivered a real-time IoT system running at 99.9% uptime. Business-minded: experienced in gathering requirements directly from clients in the Gulf and Europe and turning them into reliable, maintainable software. Seeking a full-time role; open to B2B engagements.

TECHNICAL CORE COMPETENCIES

- **Backend:** Laravel (PHP 8) [Core], Node.js (Real-Time Services), Python (Flask, Selenium Automation), RESTful APIs, Livewire, JWT, OAuth2, Sanctum, MVC, Clean Architecture, Repository Pattern, SOLID Principles, Payment Gateway Integration (Thawani), Microservices Architecture.
- **Frontend:** Vue.js 3, JavaScript (ES6+), TypeScript, Tailwind CSS, Alpine.js, AJAX, WCAG Accessibility Standards.
- **DevOps & Cloud:** AWS (EC2, S3, RDS), Docker, CI/CD Pipelines, GitHub Actions, Git, Linux Server Administration, Bash Scripting.
- **Database & Real-Time:** MySQL/MariaDB Optimization, Query Tuning & Indexing (N+1), Redis, MQTT Protocol, WebSockets (Real-Time Tracking).
- **Methodologies:** SaaS Multi-tenancy Architecture, Agile/Scrum, Client Requirement Analysis, Code Review, Performance Optimization.

PROFESSIONAL EXPERIENCE

Masqat App | Senior Full-Stack & DevOps Engineer (Contract | Remote)

Feb 2025 – Present

- Build and maintain core financial and accounting backends in Laravel, cutting data retrieval latency by 30% through query tuning and N+1 elimination.
- Design Vue.js 3 frontend components integrated with WebSockets for real-time financial data synchronization and live ledger updates.
- Engineer backend infrastructure for internal e-commerce platforms (HiSpeed and Acioman), integrated with Smart ERP for real-time inventory and pricing synchronization.
- Integrated payment gateways for the Omani market (Thawani, OMPay).
- Manage production deployments, automated order confirmation workflows and secure RESTful APIs, with code reviews for the team.

Edu-Lens (E-Learning & Examination Platform) | Full Stack Developer (Full-Time | On-site, Egypt)

Dec 2023 – Sep 2024

- Refactored database queries for a high-traffic student portal to remove bottlenecks during peak exam periods.
- Designed an interactive, gamified course platform with real-time exam progress updates in Vue.js.

Independent Tech Consultant / Senior Full-Stack & DevOps Engineer (Remote & On-site)

April 2021 – Present

Partner with startups, businesses and international NGOs to design, build and deploy SaaS, ERP, fintech and IoT systems.

Key Clients & Projects:

WaslX (Multi-Vendor On-Demand Delivery Platform)

- Built, together with a mobile developer, a Talabat-style delivery platform serving an entire governorate: backend APIs for three mobile apps (customer, vendor, delivery driver) plus web dashboards for admins and vendors.
- Implemented dual-mode real-time order and driver tracking: WebSockets as the primary channel, with automatic fallback to interval-based API polling when the socket connection is unavailable.

- Managed Dockerized Linux cloud infrastructure and production deployments for the platform.
- Built and deployed a server-side WhatsApp OTP automation service using Python (Flask) and Selenium for user authentication.

Clinova (Clinic Management System)

- Engineered a clinic management platform for doctors of all specialties, covering patient data, appointments and clinic administration.

Alsa7a Sports Platform (Oman)

- Developed the platform for a sports-sector client in Oman, implementing complex commission logic and integrating the Thawani payment gateway.

EG Follow (Social Media Engagement Platform)

- Owned backend architecture for a platform serving 10,000+ active users and 1,000+ daily orders, executing order actions (follows, likes) on Meta apps through API integrations.
- Built a Node.js real-time service connected to the Laravel backend for live order processing and status updates, secured with JWT workflows.

ICTC (EU-Partnered Refugee Platform)

- Architected a 360-degree Refugee Profile system using Laravel polymorphic relations and multi-tenant Role-Based Access Control (Laravel Policies) to secure sensitive beneficiary data across partner NGOs.
- Built streaming CSV exports (UTF-8 BOM) with Arabic/English localization and an SEO- and WCAG-optimized custom CMS that increased organic traffic by 25%.

Mazaya Almasya (Smart Home IoT Platform)

- Built a Smart Home IoT control dashboard with Laravel, Livewire, WebSockets and MQTT, supporting 99.9% uptime for bi-directional hardware communication.

Novel (Custom ERP Systems)

- Led end-to-end delivery of a custom ERP system, translating client requirements into software aligned with their operations.
- Modernized legacy web properties using Clean Architecture and the Repository pattern, improving page load speed and SEO.

B2B SaaS POS & Retail Systems

- Pioneered and continue to scale a multi-tenant SaaS POS and inventory management platform for retail SMEs, with role-based permissions and real-time sales analytics (Agile/Scrum).

Saudi German Hospital Cairo (Digital Display Infrastructure)

- Designed an advertising system controlling 1,000+ synchronized screens via MQTT and Laravel Scheduling.

EDUCATION & CERTIFICATIONS

- **Bachelor of Science in Electronics & Communication Engineering |** Minya University (2018 – 2023)
- **Professional Certification in IoT and AI Applications |** National Telecommunication Institute (NTI) (2022 – 2023)

LANGUAGES

- **Arabic:** Native
- **English:** Professional Working Proficiency
